**Academic Studies**

Students will learn from highly experienced tutor practitioners who will share their personal insights into the industry, as well as deliver the theoretical and practical components of the course through a tutorial approach.

**Industry workshops**

The industry workshops take place each week and are off-site activities that provide a unique opportunity for students to extend and broaden their academic experience through linked subject specific career-related workshops delivered by industry leading providers.

**Capstone Industry Project**

Students from related fields of study will come together to complete an interdisciplinary project based on a real-life problem-solving situation. This project is externally assessed and certified, provides an opportunity to work with industry professionals and can support students' university applications.

**Excursions & Activities**

The Activity and Excursion component provides students with the opportunity to socialise with other international students and visit places of interest within the UK that can help develop their cultural appreciation.
